Fluorite Nugget Necklace, handmade hook & eye clasp, Argentium Sterling Silver

\$160.00

Mouth-watering candy-colored chunky Fluorite nuggets and Argentium® Sterling Silver. Delicious! These are natural, untreated nuggets; 12-15 mm - a fairly hefty size. They are smooth against the skin and comfortable to wear.

Fluorite is a transparent or translucent mineral consisting of calcium fluoride and is found in a variety of stunning colors. It is not commonly used in jewelry because it is brittle and can fracture if struck. But it is truly beautiful and so worth taking a little extra care not to drop.

length: 18" including clasp
